“Transforming complex requirements into scalable, high-performance web applications.”

Summary

Dedicated **Computer Engineering Graduate** and Frontend Engineer with **1.5+ years of freelance experience**. I combine strong academic foundations in software engineering with practical expertise in building modern web applications using **Next.js, React, and TypeScript**. Proven track record of delivering scalable, performant projects for clients, with a focus on clean architecture and responsive design.

Education

Faculty of Engineering, BHI Engineering

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING

Egypt

Expected Graduation: 2026

- Major: Computer Systems & Software Engineering.
- Graduation Project: **Rowaa** (University Management ERP System) - Grade: Excellent.
- Relevant Coursework: Data Structures, Algorithms, Operating Systems, Computer Networks (CCNA Fundamentals).

Skills

Frontend Core	React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3
State Management	Zustand (Preferred), Redux Toolkit, Context API
Styling & UI	Tailwind CSS, SCSS, Framer Motion, Responsive Design
Tools & Others	Git, GitHub, REST APIs, Vite, Basic Networking (CCNA knowledge), Three.js Basics
Languages	Arabic (Native), English (Intermediate Proficiency)

Experience

Self-Employed / Remote

Global

FREELANCE FRONTEND ENGINEER

Jun. 2024 - Present

- Delivered 10+ responsive web applications for various clients using **React.js, Next.js, and TypeScript**.
- Architected clean, scalable codebases from scratch, translating Figma designs into pixel-perfect UI components with **Tailwind CSS**.
- Optimized application performance utilizing **Next.js App Router**, achieving 95+ scores on Google Lighthouse.
- Implemented robust state management solutions (Zustand/Redux) to handle complex business logic.
